

Tankless Water Heater Installation and Repair in Utah

 www.beehiveplumbing.com/tankless-water-heater-installation-repair-utah/

If you like saving money on utilities and having consistent hot water, [contact Beehive Plumbing](#) to get a tankless water heater installation estimate. [Beehive Plumbing](#) leads the Wasatch area as the top provider of tankless water heaters for commercial and residential customers.

How Do Tankless Water Heaters Work?

Tankless water heaters can be purchased in both gas and electric models depending on your utility type. When you turn on your water, the cold water will come from your ground pipes into the tankless water heater unit. This is where your water will be heated either by a gas burner or an electrical mechanism, depending on which utility you have.

With a tankless water heater, there is no waiting for the tank to refill and reheat to get your water back up to temperature. Because of this, your water will be heated more quickly. 2 to 5 gallons of water can be heated every 2 to 5 minutes. If you are operating a gas burner with your tankless heater, you will be able to heat up to 9 gallons in the same 2 to 5-minute window

Benefits of a Tankless Water Heater

There are **many benefits to choosing a tankless water heater** over a standard water heater. Benefits of tankless water heaters include:

- Take up minimal space
- Water heating is on demand
- Won't run out of hot water
- No risk of being scalded
- Units last longer, some models over 20 years
- Water is fresh since it has not been sitting in a tank
- Leaves less of an environmental footprint

- Since the system only heats water as it is used, the cost to operate it is less
- They are extremely energy efficient and will provide you significant energy savings over the year.
- Due to their efficiency, they often qualify for energy rebates. [Learn more about these rebates from Questar Gas here.](#)

Tankless Water Heater Installation

While there are many benefits to [installing a tankless heater](#), this type of heater may not be the best choice for all homes and businesses.
