

# Commercial Toilet Repair Services in Utah

 [beehiveplumbing.com/commercial-toilet-repair-services-utah/](https://beehiveplumbing.com/commercial-toilet-repair-services-utah/)

Are you in need of toilet repairs or replacements at your local Utah business? **As a leading Utah commercial toilet plumbing specialist, Beehive serves the Salt Lake, Provo and surrounding areas.** During every job, our technicians are well-equipped. Every commercial toilet installation, replacement, and repair is completed with a **100-percent satisfaction guarantee.**

## Commercial Toilet Repairs

**Beehive Plumbing** understands the importance of commercial guidelines, needs, and requirements. We've been in the business for a while, and every problem-free plumbing system we've installed is **backed by the industry's best standards.** We believe **a business's goodwill, accessibility and memorability are reflected by its comfort amenities.** For this reason, *Beehive Plumbing has assembled a **master-class team of technicians.*** Each utilizes *state-of-the-art service tools*, pairing *knowledge* with today's most *effective options.*

### Our repair services include:

- Clogged drain assistance
- Non-stop flushing fixes
- Water leak restoration
- Slow tank refill fixes
- Cracked tank and bowl restoration
- Broken handle repairs
- Flush valve maintenance
- Flushometer maintenance
- Water pressure maintenance

*Beehive Plumbing understands the many issues which arise in modern commercial toilets.* While our talented technician team is prepared to assist with the above-listed [plumbing services](#), it's also outfitted with a hefty *knowledge base.* **Each licensed professional maintains intensive knowledge about servicing needs, ensuring no problem goes unsolved.** All manufacturer's standards are met, as are commercial standards.

## Commercial Toilet Installations

Sometimes, a toilet can't be fixed. In these cases, toilet removal and replacement is needed. A toilet's installation is a delicate process, but each technician maintains the skills needed to accommodate any environment. Let us determine your **best replacement option**, and let our technicians handle bulky removal jobs. If you simply need to update your business's toilet inventory, we have you covered. Our commercial toilet collection is incomparable,

standing aside our standard toilet inventory. **A variety of styles are available—and each has been crafted to assure maximum functionality.**

## Our Commercial Toilets:

Beehive Plumbing's commercial toilet inventory prioritizes the business by offering diversity. Regardless of your business's needs, there's an answer. **Check out some of our commercial toilet options below . Each is available in several styles—so as to meet your business's visual and architectural needs.**

**Pressure and Air-Assisted Toilets**— Pressure and air-assisted toilets are today's leading toilets for commercial providers. By using the water supply's pressure, an *air-assisted toilet blasts waste down the drainpipe*. **Air is compressed in an inner tank, ensuring a constant pressure supply.**

**Low-Flow Toilets**— Also called *high-efficiency toilets*, low-flow toilets **use significantly less water** than full-flush toilets. They're used in *energy-saving* environments, as their mechanisms **can save thousands of gallons of water annually.**

**Tankless Toilets**— Tankless toilets are also popular commercial selections. Often located in public restrooms, they're built with a *valve metered with a diaphragm or a piston*. The valve is designed to shut down after a flush cycle is completed, ensuring clean, reliable operation. A tankless toilets technology is rather simple, which is why it's a **reliable option for many businesses.**

**Dual-Flush Toilets**— Many commercial toilets can be converted into dual-flush toilets. A dual-flush toilet **requires less water** to clear liquid and solid waste. A business can **save as much as 30 percent of its waste water bill** by converting to a dual-flush toilet. Because multiple power "settings" can be used, water isn't wasted when being used to clear materials.

## Emergency Plumbing Services

If an emergency happens, don't panic. **Beehive Plumbing is here to help** . Our emergency commercial toilet repair services aim to get your business running again, mitigating any costs associated with downtime. *By answering immediately, our technicians negate slippery areas, reduce potential health risks and ensure the safety of tenants and employees alike.* **Our same-day commercial toilet repair and plumbing services are available 24 hours per day**, and each visit is supported by today's latest, greatest plumbing technology.
